PROJECTS

Exploding-Kitten Tech Used - React ,Redux ,Rest api ,Tailwind Css

2020-21

- This card allows a player to defuse an Exploding Kitten card if drawn. Without a Defuse card, the player is out of the game.
- If the card drawn from the deck is a cat card, then the card is removed from the deck.

Jobify Application Tech Used - MongoDB ,ExpressJs ,ReactJs ,NodeJs

2022-23

- Introducing Jobify, an innovative job tracking application currently under development! Built with the powerful MERN stack, Jobify aims to simplify the job tracking process and empower users in their job search.
- Key Features (under development): Create, delete, and track job opportunities , User login and authentication with JWT , Job state tracking: pending, interview , or declined , Job stats to monitor progress , MongoDB integration for database management , Front end- backend integration using Node.js.

Portfolio Management Application Tech Used - NextJs , TypeScript , Tailwind CSS

2022-23

- Developed a full-featured portfolio tracker application using Next.js and TypeScript, focusing on modern web development practices and performance optimization.
- Implemented responsive UI components with Tailwind CSS, ensuring a seamless user experience across various devices.

WORK EXPERIENCE

Ampius Technology

Remote

Backend Developer - Intern

March 2023 - Aug 2023

- Continuously improve my programming skills in languages commonly used for backend development such as Python , Django. Understand the importance of testing and quality assurance in soft- ware development.
- Frontend developers often work with a range of technologies such as React UI. Achieving a deep understanding and mastery of these technologies as well as frameworks and libraries like React Angular or can be consider a significant achievement.
- Worked On Web App and Developed Many Screens Like Camera Screen open and closed , Login and Screen etc, Using React.

Oasis Infobite

Remote

Front End Developer

Feb 2023 - April 2023

- Developed Marketing Page for different campaigns , interacting with Product and Marketing Team by 50
- Collaborate with the front-end developers to integrate user-facing elements using server-side logic by 40
- I have been working on my JavaScript skills and this project has been perfect for me to practice my skills. The 'To-do list' has been made using HTML, CSS and JavaScript.

EDUCATION

Maulana Abul Kalam Azad University of Technology

2021 – 2025

B.Tech in Computer Science and Engineering - CGPA - 8.42

Nadia, West Bengal

Akhondabaria SC High School

2019 – 2021

Percentage - 76.8

SKILLS

Languages: C++ , JavaScript , Python

Frameworks Libraries: React.js , Next.js , Node.js , Express.js , Mongoose , Prisma , Tailwind CSS

Databases: MongoDB , MySQL , PostgreSQL

Tools: Git , FireBase

ACHIEVEMENTS

- Continuously improve my programming skills in languages commonly used for backend development such as Python , Django. Understand the importance of testing and quality assurance in soft- ware development.
- Solve 525+ Questions On Leetcode , Geeksforgeeks.
