PROJECT EXPERIENCE

Lenovo VE
Software consultant

- Developed a high performing and Premium experience React native application for users to manage their devices.
- Collaborated with UX Designers to craft an intuitive interface for users, **improving user experience**.
- **Mentored** junior developers in clean code principles and react native best practices.
- Took the ownership in setting up the infrastructure for the project.
- Enhanced application functionality by implementing new features and **optimising existing code**.
- Contributed to Spring boot micro services and **developed API's** that are being consumed from the react native application.
- Actively **helped** team members to unblock the issues

Lenovo HEC
Software consultant

- Collaborated with **multidisciplinary** teams to design and implement new technology features.
- Used .NET, C# to develop new windows services
- Authored **code fixes** and enhancements for inclusion in future code releases and patches
- Designed an **test automation** framework which has reduced the time for testing the application from 2hours to 7 min.
- Created personalised reports from the logs which **reduced the debugging** time.
- Facilitated onboarding and knowledge transfer for new team members.
